Valley of the Moon

The valley of the moon is located in a historic site that needs to be developed to enhance its historic and appealing elements. Design mainly focused on enhancing the walkways to provide a way of finding the interesting elements along. Some existing walkways were narrowed in wide to make a sense of place and to orient people in an intimate movement. Existing playful and interactive areas were enhanced in its context by buffering with native plants and lined with stones for a better oreintatatio to visitors. The existing basin behind the fuerry queen house has been utilized through establighing an adjoing swale and two seating areas. Concerete walls adjacent to the house has been removed and replaced with decorative stones to emulate what is being done in other similara areas.
